

Value to Manure

Report Focus Area 3

Nairobi, January 24th, 2013

State of the art I

Since the Seoul meeting:

- Manure Management Improvement Program
 - Manure Kiosk: knowledge sharing
 - Pilot projects: realise improvement

Nairobi meeting:

- 2 people of Seoul meeting in current meeting
- We need continuity !
- Governance ?

Outcome working group I

- Value to manure
 - Zero discharge: not clear, negative connotation
- Focus on policy, not on technology
- All farm sizes matter
- Balancing
 - Nutrients in manure $>$ uptake capacity
 - Nutrients in manure $<$ uptake capacity

Activities

- Inventory current nutrient excretion and manure management: mapping
- Identify and define pilot projects
- Workshop in SE-Asia (fall 2013)
- Link to PPLD (IFAD)

What do we need

- Communication: manure has a value
- Collect best practices
(still tailoring needed)
- Policy handbook
- Experts on multi stakeholder
processes and policy implementation
- Awareness “do no harm”

What we need to do

- Organize continuity:
 - set up core team (the workers)
 - go back to own organisation and find new members for core team
- Nomination of representation Guiding Group
- Sharepoint (part of the Manure Kiosk)
- Identify new participants
- Identify potential donors
