

Equity and Growth

- Propose a theme on market integration – including value chain approach, and considering regional context & specifics

Initially:

- Understanding how to enhance efficient, equitable and transparent livestock markets.
- Integration of all production systems and scales into value chains.
- Market intelligence and forecasting systems.

Potential actions

- Facilitation of:
 - Validation, developing and sharing methods to analyse market efficiency, contributing to mechanisms to its increase.
 - Finding and sharing lessons on market integration, with attention on small producer systems, to contribute to guidelines to enhance integration
 - Better understanding of supply and demand projections. Tap into existing networks working on this.
- Strong recommendation to facilitate existing regional and national processes.
