A Sustainable Development Framework for Livestock

Align

Connect

Progress

Greenhouse gases

Soil nutrients

Waste

Water

Soil

Biodiversity

Market development

Rural economies

Working conditions

Product safety
and quality

Animal care

A Sustainable Development Framework for Livestock

- A Framework versus Standards
- Continuous improvement versus Point in Time reporting
- Honest and transparent approach that recognizes we need to improve versus simply trying to convince everyone we are right
- A single inclusive Framework that allows the entire industry to participate versus multiple exclusive programs that try to define right and wrong - winners and losers
- A framework that will deliver global alignment, connection and progress

A Sustainable Development Framework for Livestock

- Dairy is RELEVANT
- Dairy is IMPACTFUL
- **Dairy is RESPONSIBLE**
