

Observations from the field visit

Group 10

10 May 2017

BORA DISTRICT ETHIOPIA

What would work well

- Improved access to market for milk and other livestock products (SDG 1)
- Impact on access to formulated concentrate feed (SDG 8)
- Women participation for livestock (SDG 5)
- Use of technology in feeding, breeding and management by farmers (SDG 8)
- Potential for diversity of livestock farming to minimize uncertainty (SDG 1 & 8)

What would not work

- Dairy farmers entirely depend on formulated feed of companies and unaware of formulating their feed using locally available ingredients
- Hardiness and adaptability of genetic merits not taken into account in genetic improvement programs
- Lack of effective professional organizations to participate for livestock development
- Economic and efficiency limitations of high-input strategies not taken into consideration
- No nutrient returns to the soil

Women as livestock enterprenuers
