Socio-economic contribution of pastoralism: case studie: Puna of Argentina

Mariana Quiroga Mendiola quiroga.mendiola@inta.gob.ar

Arid en vironments

Scarce rain And high interanual precipitacion variation Great annal and daily temperature differences

herders

in the world

40% production value

nurish to almost 1000 million people

25 % of the lands in world

Nortwestern
Argentine
70%
(48.000)

Puna of Argentine

(20.000 pastoralists families)

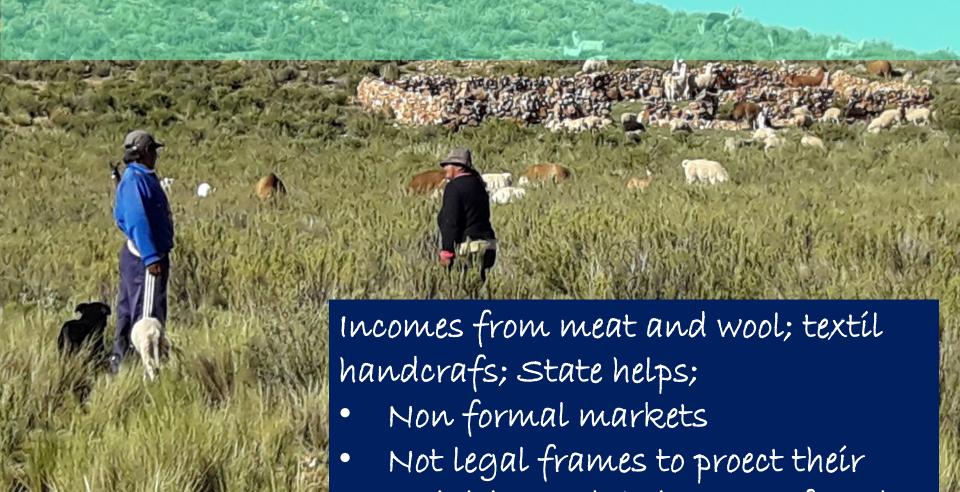

High biodiversity of domestic animals: lama, sheeps, some goats, cattle and donskeys

Pastoralist are mainly the women

Usually they are not owners of land Difficulties to access to water; roads; markets; communication; credits

Puna of Jujuy

33% of the province population

284.460 sheeps (75%), 137.532 lamas (97,6%); y 79.081 90ats (56%)

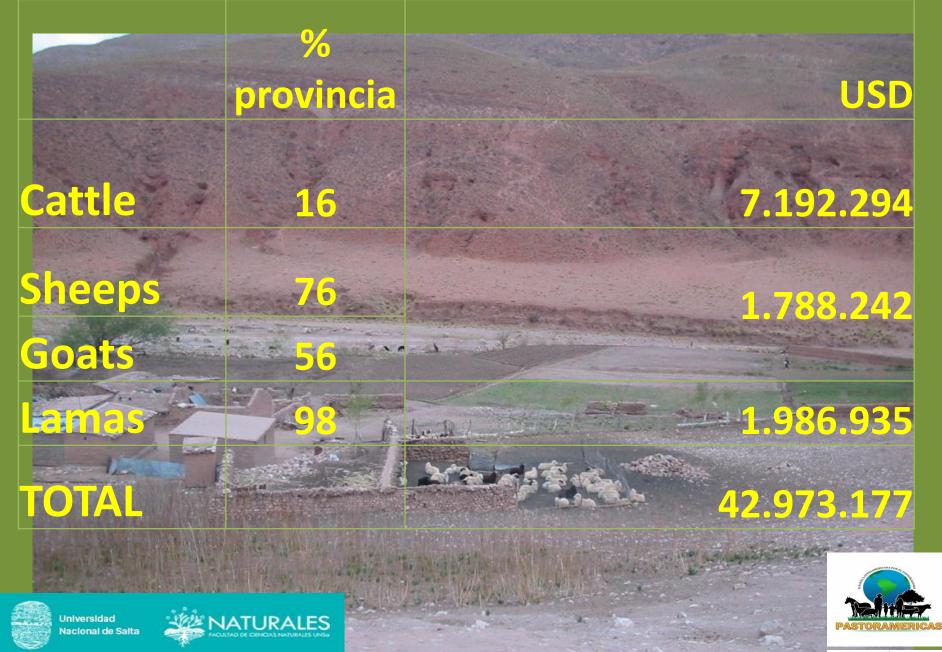

60 t to 120 t of Lama wool = 8.800 \$to 162.500\$/year

=92.300\$/year

330 t de Lama meat and 200 t of ovine meat = 530.000 kg meat 2.000.000 \$ /year

TO THE SECTION OF 1/8.000 Domestic units produce 2,3 mill dollars/year perhaps 20.000 u.D. produce ca 5,75 mill dollars/y

Thank you
