Innovation for Sustainable Livestock Systems

9th MSP Meeting of the Global Agenda
for Sustainable Livestock, Kansas USA
9 to 12 September 2019

BUILDING TOGETHER SUSTAINABLE LIVESTOCK
for people, for the planet

Innovation for Sustainable Livestock Systems

- GASL is a **multi-stakeholder partnership**. It enhances the contribution of livestock systems to sustainable development and is a recognized platform for sharing solutions
- For GASL, it is important to support and magnify the work of its partners with a multi-stakeholder approach
- Innovation is crucial for a sustainable development of the livestock sector along the respective value chains
