Meet rising demand for dairy products with sustainable increases in milk productivity and farm profitability.

Integrate small-scale producers in the modern value chain through the promotion of fair and efficient markets.

Protect and enhance human health by improving dairy food quality and safety and by enabling consumers to make informed choices on the benefits and risks of dairy products as part of their diet.

Enhance resilience and adaptability of dairy systems by strengthening stakeholder capacity to cope with production and market risks and by enhancing innovation.

Protect and restore terrestrial ecosystems by minimizing the dairy sector’s environmental footprint.

Combat climate change by reducing greenhouse gas emissions along the dairy chain.

Enhance levels of education through school milk programmes and the transfer of knowledge and best practices to all actors involved in the dairy chain.

Promote gender equality by ensuring women receive recognition for their work in dairy production, processing and marketing; and by encouraging women to take up leadership positions.

Improve access to clean affordable energy through promotion of bio-gas from dairy systems.

Protect and restore terrestrial ecosystems by minimizing the dairy sector’s environmental footprint.

Combat climate change by reducing greenhouse gas emissions along the dairy chain.

Enhance levels of education through school milk programmes and the transfer of knowledge and best practices to all actors involved in the dairy chain.

Promote gender equality by ensuring women receive recognition for their work in dairy production, processing and marketing; and by encouraging women to take up leadership positions.

Improve access to clean affordable energy through promotion of bio-gas from dairy systems.

Strengthen the means of implementation by building national, regional and global platforms for dairy development.
