Interpretation
- Interpretation is available in English, French and Spanish and can be selected in the bottom bar of your screen
- Do not use your built-in computer microphone, use a USB-headset with integrated microphone
- Or a wired cell phone earphones/mic, not Bluetooth
- An external USB-wired microphone is the next best solution
- If several participants use one microphone, make sure whoever is speaking is close to the microphone.
- Connect your computer via an Ethernet cable to your router and disconnect other devices,
- Have your video on when you take the floor
- In a virtual meeting, audio quality may deteriorate unexpectedly and become insufficient for interpretation purposes. Interpreters will indicate this verbally and resume interpretation as soon as the sound quality permits.
