Livestock Sector Actions Towards More Sustainable Food Systems

Sustainable livestock for natural resources and the environment

1. Reduce greenhouse gas emissions
2. Maintain biodiversity
3. Provide ecosystem services
4. Improve nutrient cycling
5. Increase soil carbon sequestration

#COAG27
India's Dairy Sector flourishing under the visionary leadership of our Hon. Prime Minister Shri Narendra Modi

- India achieving a consistent growth rate of 6% per annum in milk production, 3 times faster than the world average.
- Milk Production increased by more than 44% in the last 8 years.
Signed Collaboration Agreements on Reduction of Greenhouse Gas Emissions (GHG) of Livestock Supply Chain in Thailand

Pathways to Dairy Net Zero

September 2022

Donald Moore,
Executive Director
Global Dairy Platform
We are solutions or we are a problem!
UN Food Systems Summit Surprises U.S. Animal Ag Groups

Exploring the impacts of a world without food animals
We want someone else to write our narrative!

OR

“We will together write our own Global Positive Balanced Narrative for Sustainable Livestock Transformation”..?
“Positive Narrative & Pathways to Sustainable Livestock Transformation”

Let us tell our stories, we are solutions!
“Livestock play roles and contribute to the Food Systems”
We will walk together, you are not alone!
